

User Agreement for Access to the Neuromorphic Computing Platform of the Human Brain Project.

Between University of Heidelberg and University of Manchester, hereinafter referred to as “SP9” and

hereinafter referred to as “User”

Prerequisite: The User signed the “HBP Collaboratory Terms of service” document for gaining access to an HBP Community account. That document contains the links to the all mandatory regulation and requirements regarding Ethics limits for the carried out research, including data privacy, data origin, no research for military purposes, etc.

In addition to those mentioned terms of service the User agrees:

- To use the system only for the purposes of the project for which access was granted
- To report any changes in contact information
- To report any significant changes in the provided research plan.
- Not to request any indemnity or compensation from SP9 for any damage suffered as a result of imperfections of the system.
- That the User understands and accepts that the Neuromorphic Computing Platform is an experimental system. No guarantees regarding reliability or availability are given. The systems may be taken offline at any time for maintenance, upgrades etc. No guarantee is given regarding the operation of the systems.
- That a quota system is in place. This may limit the number of jobs, their duration, total results data storage capacity etc.
- That experiment input data and results data may *not* be backed up. It is the User’s responsibility to store that data.

- That SP9 reserves the right to suspend the User's access to the system and take legal actions if the user breaches any of these obligations.
- That any publication that includes results obtained with the Platform shall acknowledge "The Neuromorphic Computing Platform of the Human Brain Project".
